

West Hartford Public Schools

Exchange Program with Spain

The INTERCAMBIO experience

INFORMATION FOR INTERESTED FAMILIES

The Intercambio program offers students from West Hartford and Madrid a unique linguistic and cultural experience through a homestay enriched by travel and educational activities. The program sends a group of West Hartford students to Madrid during odd-year summers (2017, 2019, etc.). During even-year summers (2018, 2020, etc.) we host a group from Madrid with families in West Hartford. Participants make a two-year commitment, and may begin the program either by hosting or traveling first. New applicants will travel this summer and then host the following year. Each summer, the program lasts approximately 4-5 weeks, beginning about a week after the school year finishes and ending the last week in July.

The coordinators from the West Hartford Public Schools and Santa María del Pilar (our sister school in Madrid) match participants based on age and interests, taking into account family and home situations as well. The selection process may include contact with a guidance counselor and teachers, a review of school files, an interview with family members and a home visit. Participants normally stay with the family of the child they hosted or will host.

The hosting commitment for families in the program includes the following:

- Accepting an exchange visitor as a new member of the family (not an honored guest), subject to the same rules and regulations as other members of the family.
- Providing an environment where an exchange visitor and his or her family will feel that you are genuinely concerned for his or her personal well-being and safety.
- Providing guidance and understanding to a young visitor from another culture who will also be subject to the same feelings, frustrations and growing pains as all teens.
- Setting an example from which an exchange visitor will learn about life in our country, including family relationships, cultural variances, and value systems.
- Staying informed of the group's efforts to plan logistical and enrichment aspects of the home stay (day trips to New York & Boston, sporting events, farewell party, etc.)

continued on back

Traveling – summer 2017

Before the home stay in Madrid, participants enjoy a group excursion in which they visit and explore several historic cities. Many spend time at a family's summer home in the mountains or on the coast. The cost is approximately \$3500 (depending on the exchange rate) and includes all expenses except lunches during the excursion and incidentals during the entire trip. We will be in Spain from the third week of June until the last week in July.

The travel and home stay components of the exchange program are enriched by several activities for participants, who are eligible for one high school credit upon completion. The requirements include attendance at an evening class prior to departure, keeping a diary, anticipation and reflection papers, group exploration activities during the excursion, and classes and day trips coordinated through our sister school.

Hosting – summer 2018

Visiting students from Santa María del Pilar will spend a month from the last week of June until the last week of July in West Hartford. They normally attend summer school sessions in the morning. Families are encouraged to include visitors as a part of family trips and activities. The coordinators organize a few special activities, help host families plan group activities, and will be on call at all times. Participating families are expected to attend a preparatory meeting prior to the arrival of the group.

Hall: MariaPilar_delcacho @whps.org

Online application procedure:

The applications for Intercambio are accessible via Hall's website.

There are two separate sections, one for students and another for parents.

Both must be completed and sent for an application to be considered.

Students will need to attach a photo at the end of their application.

Type "hall intercambio" into Google and it will be the first option.

<http://www.whps.org/page.cfm?p=1868>

Applications will be accepted until December 23, 2016, after which time their receipt and status will be communicated to all applicants. The recruitment period may be extended if necessary.
